

König RepairLux® Granulate 403 020 - 025

Uses

- A supplement for the repair of polishable natural stone (not sandstone, or porous limestone) and diverse engineered stones.
- To imitate crystalline structures in stone.
- Reinforces colouring of the fillers in fine-grained stone and creates a crystalline effect.
- Can only be applied in combination with RepairLux® Transparent Liquid/Base.
- Recommended for indoor and outdoor use.

Characteristics

- A granulate shaped filler.
- Various colours.
- High stability and resistance.
- Lightfast.
- Weather resistant.
- Note: After application this product always has to be sealed with RepairLux® Transparent Liquid.

Application

Ensure processing temperature is above +8°C (filler and surface). Do not apply in direct sunlight. The crystals have to be premixed into RepairLux® Transparent Liquid/Base prior to application on the stone. Selection of the colour and grain size depends on the damage depth and the colour shading. To imitate crystalline structures and shadings the filler can be combined with relevant Colours (art.no. 403 006-019). In order to achieve an optical depth it is recommended to build up several coats with intermediate hardening. Ensure height of each coat does not exceed 3 mm. After filling, level off crystals and filler. Minor flaws, which may develop during levelling, can be equalized with RepairLux® Transparent Liquid, if necessary.

For detailed description of the individual system components and their use, please refer to the instructions for use.

Specifications

Temperature resistance: for a short time up to 150°C.
Shelf life: at least 2 years
(stored in original unopened container and lightproof at 2-28°C)

Safety Precautions

- Do not breathe dust.
- For professional use only.

Disposal

- Leftover materials and containers to be disposed of according to official regulations, when completely emptied. For detailed information please ask your local waste industry office.
- Product is an inert plastic material which can be disposed of according to the local official regulations.
- European Waste Code for plastics: 200139.

Packaging

Granulate Fine, 5g tin

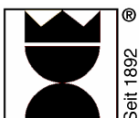

Transparent art.no. 403 020
Black art.no. 403 021
White art.no. 403 022

Granulate Coarse, 5g tin

Transparent art.no. 403 023
Black art.no. 403 024
White art.no. 403 025
